Dear Samantha:

re:3D is a 3D printing hardware manufacturer based in Austin and Houston. We make the Gigabot, a large-scale 3D printer that allows for creation at the human scale. With a bed-size 30x larger than your average desktop 3D printer, we like to say that Gigabot is a printer for problem solvers in the real world.

Our team has a passion for education and enabling younger generations. This is why we are pleased to offer a discount to the member libraries of your fine organization.

Here's what we can do for you:

- 10% off equipment
- 10% off supplies
- One free hour of training for every 4 hours purchased

All Gigabots are made and manufactured by hand right here in Texas, and we are pleased to have machines in over 25 countries. We hope we can add your facility to the list! If you're interested in learning more about Gigabot, please reach out to our sales team at sales@re3d.org.

Sincerely,

Samantha Snabes
